IP Phone Overview

What's in the box

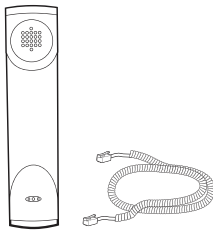

Thank you for choosing the SoundPoint® IP-330/320, a two-line Voice over IP telephone with features and functions such as Multiple Call Appearances, Call Hold, Transfer and Conferencing over an IP network.

The following items are included in your SoundPoint® IP-330/320 package. If you are missing any items, contact Northwest Vox.

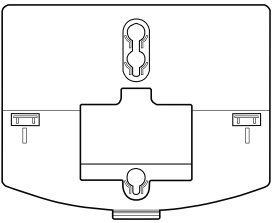

SoundPoint® IP-330 Console

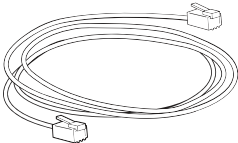

Handset and Cord

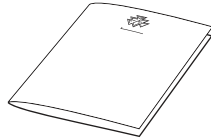

Wallmount/Base Stand

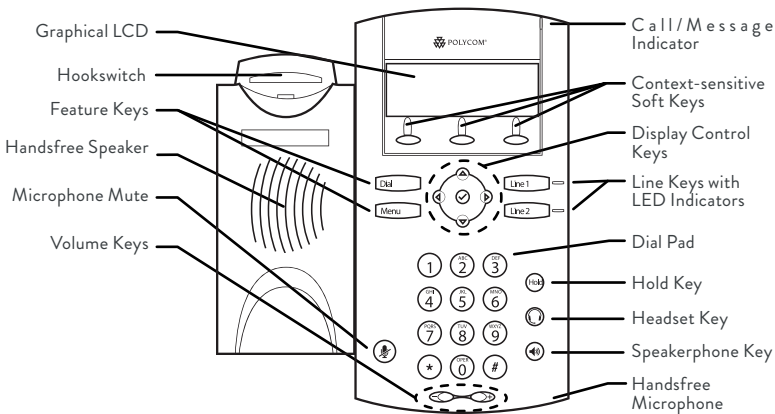

Network/Ethernet Cable

Quick Start Guide

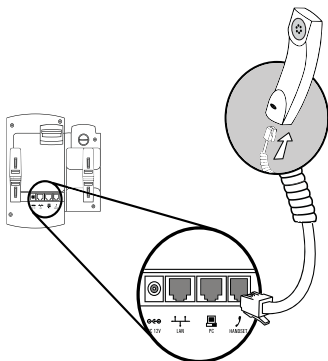

IP 330/320 Features

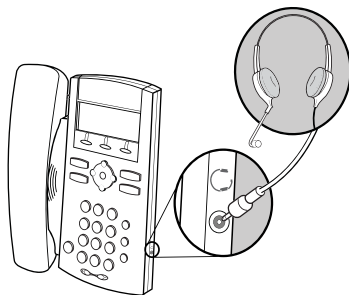

Installation

Basic Set-up

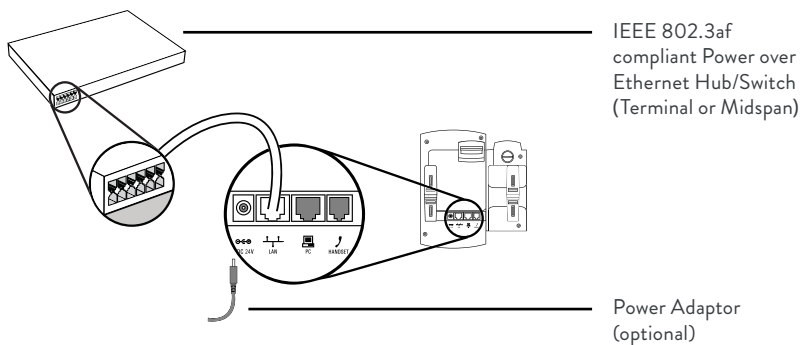

① Connecting Handset:

② Connecting Optional Headset:

③ Connecting Network and Power:

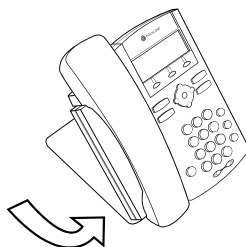

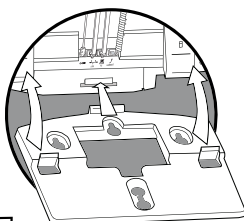

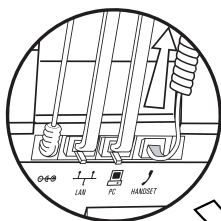

Installation

Attaching the Base Stand

The base stand can be attached to the SoundPoint® IP-330/320 in one of two ways:

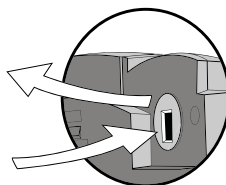

Deskmount Method:

- 1 Connect all cables.
- 2 Align tabs of base stand as shown.
- 3 Snap firmly into place.

Wallmount Method:

- 1 On the back of the phone, remove the key located behind the hookswitch. Reposition it so that the end tab (at 45° angle) is facing up. This will ensure that the handset remains in place within the cradle in a wallmount position.

- 2 With mounting tab of the base unit facing up, fasten the base stand to wall using wall anchors (not included). When base stand is secured to wall and all cables are connected, snap the SoundPoint® IP-330/320 into place.

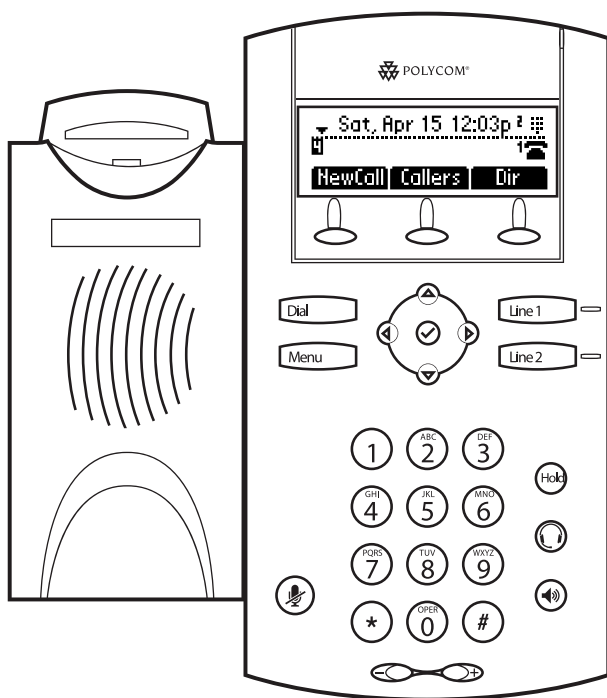

Start Up

Powering Your Phone

As soon as power is supplied, the SoundPoint® IP-330/320 starts an automated process of establishing itself on the network and downloading software and applications. You are ready to use your SoundPoint® IP-330/320 when a screen similar to below appears.

For further instructions on how to use your new SoundPoint® IP-330/320, consult the User Guide available from polycom.com.
